ARKANSAS

Why did my state receive this rating? Arkansas has elements that are friendly to prevention but should take further action to make prevention education viably accessible to youth.

Who does exploitation and trafficking impact? Each year millions of children are victims of trafficking and commercial sexual exploitation, affecting communities small and large. This happens all over the world, including in your own community.

How does this happen? Children are most often exploited by an acquaintance (significant other, friend, family member, etc.). They are targeted, groomed, tricked, and manipulated.
