Why did my state receive this rating? Wyoming is in the bottom tier and should actively work to improve statutes to make prevention education viable and accessible for youth.

Who does exploitation and trafficking impact? Each year millions of children are victims of trafficking and commercial sexual exploitation, affecting communities small and large. This happens all over the world, including in your own community.

How does this happen? Children are most often exploited by an acquaintance (significant other, friend, family member, etc.). They are targeted, groomed, tricked, and manipulated.
